INVISIVENT® AIR (2Pa)

Supply in the dry rooms via Invisivent® AIR
Extraction in the wet rooms via Healthbox® 3.0

Example: Option design exterior cover – standard installation

- ✓ Acoustic comfort: acoustic damping, even on basic model [Light-version]
- ✓ Energy comfort: only minimal energy losses due to the self-regulating valve
- ✓ Thermal comfort: no uncontrolled ventilation
- ✓ Aesthetic solution: discreetly on top of the window profile [optional with design exterior cover]
- ✓ Very good indoor air quality: combined with Healthbox® 3.0

INVISIVENT® COMFORT (10Pa)

Supply in the dry rooms via Invisivent® COMFORT
Extraction in the dry and wet rooms via Healthbox® 3.0 [SmartZone]

Example: Option design exterior cover – completely recessed installation

- ✓ Superior acoustic comfort: superior damping [basic – high – ultra high]
- ✓ Superior energy comfort: no cross-ventilation and extremely energy-efficient
- ✓ Thermal comfort: no uncontrolled ventilation
- ✓ Aesthetic solution: discreetly on top of the window profile [optional with design exterior cover]
- ✓ Optimum indoor air quality: even better matched to the smart extraction box, Healthbox® 3.0
