RENSEIGNEMENTS GÉNÉRAUX

Grâce à notre éventail complet de couleurs standard, votre pergola est toujours parfaitement assortie au style de l'architecture qui l'entoure. Le thermolaquage des profils en aluminium garantit à la fois l'apparence esthétique dans différentes finitions et une protection durable contre les influences extérieures. Les produits de Renson bénéficient en outre de série d'un prétraitement Seaside Quality.

Seaside Quality A

Seaside Quality A est une méthode de prétraitement sur la ligne de thermolaquage prévoyant de décaper min. 2 gr/m² avant le thermolaquage. Ce traitement supplémentaire protège les profils en aluminium dans les environnements agressifs tels que les régions côtières, d'industrie lourde, etc.

Différence entre la Seaside Quality et la pré-anodisation

La pré-anodisation est un traitement préalable protégeant les profils contre les environnements très agressifs. La pré-anodisation se fait sur une ligne d'anodisation séparée et pas directement sur la ligne de thermolaquage. Après une pré-anodisation, il faut traiter les profils avec précaution et les protéger rapidement en les thermolaquant. Les profils des toitures de terrasse ne peuvent pas être laqués directement ni sans autre finition. De ce fait, la qualité de la pré-anodisation ne peut pas être garantie. C'est pourquoi nous ne la recommandons pas pour nos produits Outdoor.

Seaside Quality A offre aussi une excellente protection contre les environnements agressifs.

Finition du laquage

Selon l'effet souhaité, 3 sortes de thermolaquage sont possibles.

- Laquage structuré
- Laquage brillant (niveau de brillance 70 %)
- Laquage mat (niveau de brillance 30 %)

CONSEILS DE COULEUR ET DE STYLE

laquage structuré

Renson conseille le laquage structuré pour un aspect architectural plus contemporain. En outre, le laquage structuré est moins sensible aux rayures, qui sont de plus moins visibles.

Conseil:

Pour la facilité d'entretien, il est possible de choisir les lames dans un laquage avec une finition mate ou brillante. Utilisez toujours le kit de maintenance Renson® pour un nettoyage rapide et sûr de la pergola.

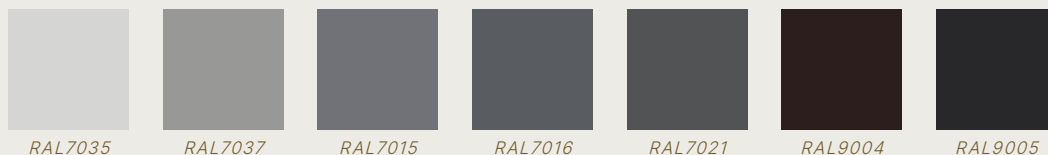

Bicolore

Le fait de choisir les lames dans une couleur plus claire que le cadre et les colonnes vous permet de créer davantage d'ouverture et de lumière sous la pergola. Une toiture avec des lames claires réfléchit mieux la chaleur du soleil et crée plus de luminosité dans la maison (notamment en cas de construction d'une annexe), tandis que des lames foncées absorbent davantage de chaleur. L'option bicolore est disponible au prix standard.

Outdoor Top 20

Les couleurs Outdoor les plus populaires sont regroupées dans l'Outdoor Top 20. Cette sélection de couleurs standard correspond aux dernières tendances en matière de couleurs et simplifie dès lors le choix d'une couleur. L'Outdoor Top 20 suit les évolutions en matière de tendances de couleur et peut être modifié chaque année.

Wooddesign

Profitez de l'aspect naturel et chaud du bois, mais avec tous les avantages et la facilité d'entretien de l'aluminium. La finition Wooddesign est disponible sur les lames de toit des pergolas et les lames des panneaux de Outdoor Loggia en aluminium.

- Thermolaquage indécolorable avec structure bois
- Demande peu d'entretien
- Disponible en 3 finitions :
 - Chêne blanc
 - Chêne clair
 - Noyer
- Garantie sur la brillance et la couleur : 5 ans

Applicable sur :

- Lames de Loggia Paro / Privacy en aluminium *
- Camargue **
- Camargue Skye **
- Algarve **
- Aero **
- Aero Skye **

* Non applicable sur les lames Loggia Plano.

** Non applicable en combinaison avec Lineo Luce (lames de verre), Lineo Fix ou Lineo Heat. Les larmiers sont peints dans une couleur uniforme en fonction du laquage de base Wooddesign (sans structure bois). La lame fixe / le décrochage suit la couleur du cadre et des colonnes (pas de Wooddesign possible).
