

APERÇU DES APPLICATIONS FIXSCREEN MINIMAL M 7 COULISSES POUR FIXATION À LA FENÊTRE

Sur la base de la matrice suivante, Renson vous guidera vers le type le plus adapté* de coulisses pour votre application.

Pour le Fixscreen Minimal, Renson propose deux types de coulisse pour la fixation à la fenêtre, le type .WF et .WS. Le nom se réfère à la direction de la fixation au cadre de la fenêtre, soit frontale (Front) = W.F, soit latérale (Side) = WS.

Pour la coulisse .WS (Windows Side), la largeur totale du screen = la largeur totale de la fenêtre. Afin de pouvoir toujours compenser une éventuelle tolérance entre la fenêtre et le screen, la position de la bride est décalée de 2 mm vers l'extérieur. De cette façon, la combinaison sera toujours réussie. Renson fournit des pièces de remplissage isolantes en standard, pour tout dépassement.

* Renson recommande la solution la plus adaptée, d'autres combinaisons sont possibles (par exemple avec la coulisse XS).

<

| ÉTAPE 1 | ÉTAPE 2 | ÉTAPE 3 | | | | | | | | | | | | ÉTAPE 3 | | | | | | | | | | | | | |

| Fenêtre minimaliste | | | | | | | | | | | | | | | | | | | | | | | | | | | |

Attention : Zone de vis = 30 mm à l'extérieur du caisson. ** Attention : Zone de vis = 50 mm à l'extérieur du caisson et caisson de base.

Comment utiliser cet aperçu ?

Étape 1: Type de fenêtre appliqué

Étape 2: Suppléments / épaissements ou profils de renforcement éventuels

Étape 3: Méthode d'installation appropriée et type de coulisse. Choisissez le type de caisson en fonction de la surface maximale requise.

Attention : Combinaison avec Invisivent®, quel que soit le type de fenêtre → M 7B et coulisse .WS
