RENSON POWDERS

- Renson keeps a wide range of the most common powders in stock. These powders are classified in powder category A and are listed in this colour guide. Powder category X includes most other powders. These were not included in this catalogue, but can be found in the online ordering platform RIO. There is always a surcharge for powders from category X. These surcharges can be found in the price lists of the respective products per powder category. Surcharges can be obtained on request for powders that are not included in RIO.

- We evaluate our powder categories annually and powders are added to or removed from category A accordingly.
